## **Business evolution H1 2025**

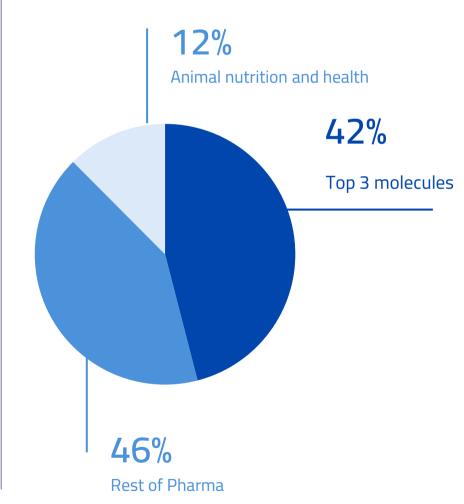

## Growth in all areas of the Group

## Led by the strong performance of the three strategic molecules

## Revenues by portfolio line

	S1 2025	<b>S1 2024</b>	%
Pharma	269.0	247.8	9%
Pharma top 3 molecules	127.7	110.5	16%
Rest of Pharma	141.3	137.3	3%
Animal Nutrition and Health	38.3	26.0	48%
Total	307.4	273.7	12%

# Revenues by porfolio line

## Highlights of the main molecules

Very positive evolution with excellent performance in both direct sales and Licences

#### **Bilastine**

**82.7** M€

Good performance during the quarter with growth of +11% in which the main driver was the evolution of the international subsidiaries accompanied by a positive evolution, both in Spain and in Licences.

#### **Calcifediol**

**33.0** M€

Sales growth of +13% in the quarter supported mainly by the evolution of licensing sales and those of the international subsidiaries and Portugal.

#### Mesalazine

11.9 м€

Mesalazine is the molecule with the highest percentage growth of +69% compared to 2024. In this case, almost all of the growth comes from licensing, mainly due to the good performance of the product in Poland.

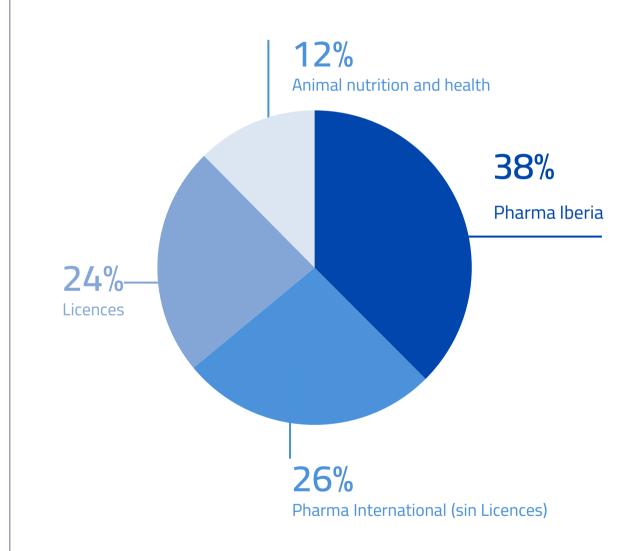

## All business areas trending positive

## Revenues by business area

	S1 2025	S1 2024	%
Pharma	269.0	247.8	9%
Pharma Iberia	115.8	110.0	5%
Pharma International (without licenses)	81.7	71.7	14%
Pharma Licenses	72.8	64.4	13%
Other*	-1.2	1.7	-
Animal Nutrition and Health	38.3	26.0	48%
Total	307.4	273.7	12%

<sup>\*</sup> non-commercial income and exchange rate impact

### Revenues by business area

## Pharma business, solid growth in all lines

## **Total Pharma revenues: 269 M€ +9%**

#### /01

#### **IBERIA +5%**

Pharma Spain's growth of +4%, sustained mainly by prescription, which together with the incorporation in June of Laboratorio Edol, offset part of the slowdown in Portugal's growth.

#### /02

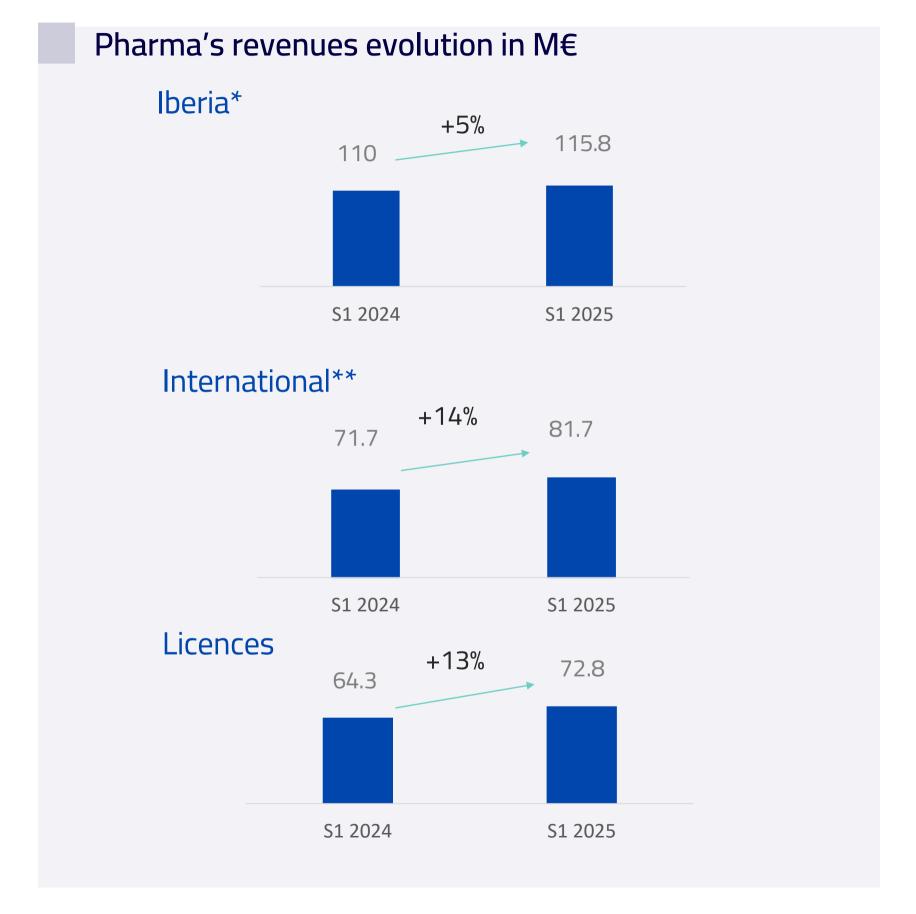

#### **INTERNACIONAL +14%**

Of note was the good performance of LATAM +17% and ROW +9% which recovered growth in all markets.

#### /03

#### **IBERIA +13%**

Driven by the strong performance of Bilastine +8% which fully absorbed the effect of the loss of exclusivity in Japan and Canada, together with growth in Other licences +36%.

<sup>\*</sup>Spain and Portugal

<sup>\*\*</sup>Without Licences or Portugal

## Pharma Iberia, the different channels are developing positively

### **Iberia revenues: 115.8 M€ +5%**

/01 **SPAIN +4**%

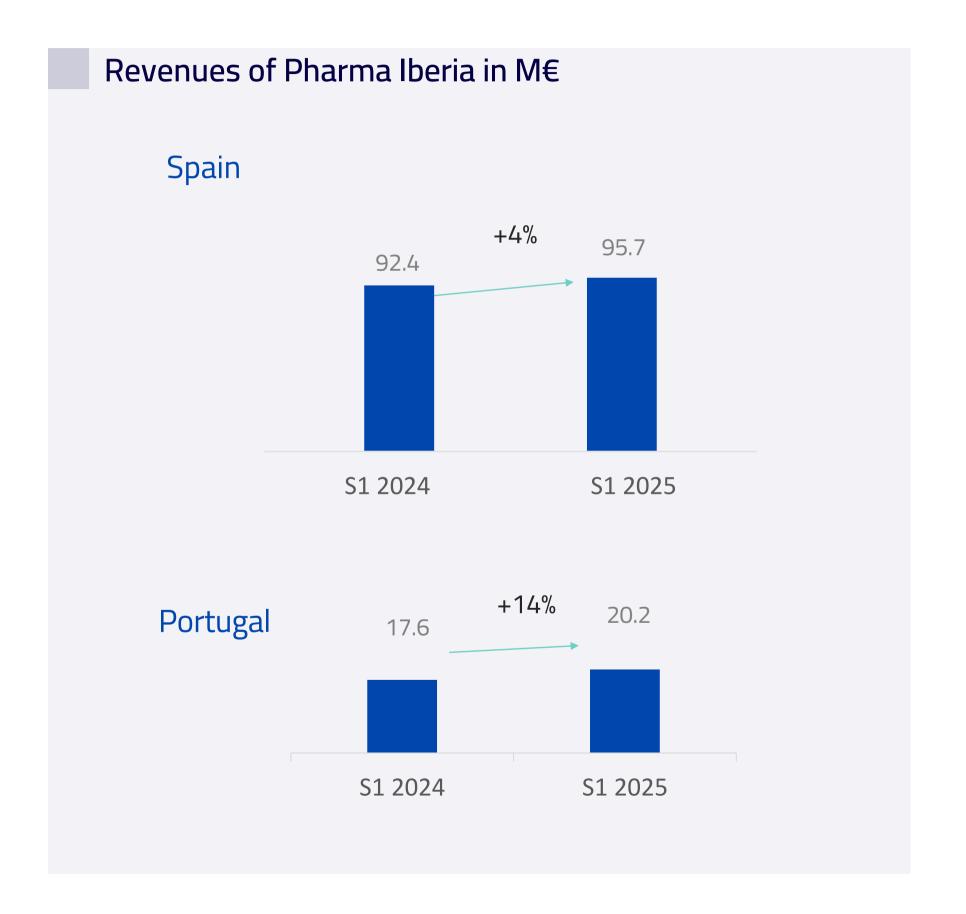

Prescription grew +8% with positive evolution of all strategic products, especially bilastine +18% thanks to new formats and the respiratory franchise which grew double digit +23%.

This growth offsets the slowdown in Healthcare & consumer (-3%), which is expected to be reversed by activating certain action plans such as promotional campaigns in the food channel.

## /02 **PORTUGAL +14%**

Growth mainly in prescription, offsetting the performance of some Healthcare products.

Incorporation in June of Laboratorio Edol.

## Pharma International, Latam as the growth engine

## International revenues: 81.7M€, +14%

/01 **LATAM +17**%

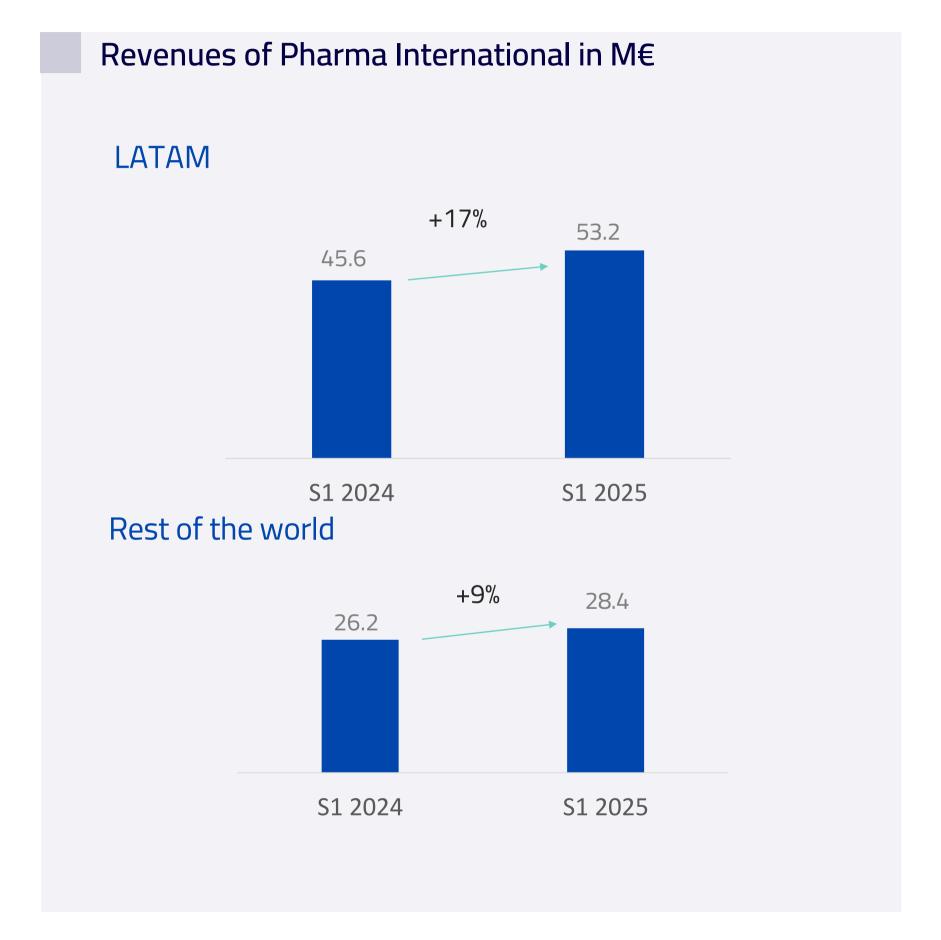

Colombia +32%, Ecuador +33% and Peru +24% continued to perform very positively, with strong growth, based on the strategy of maximising the growth of our strategic products, bilastine and hidroferol.

Chile +13% growth in the retail market minimised the impact of the decline in institutional sales.

Central America-Caribbean grew +1%, affected by the performance of some countries for which an action plan has been implemented that will bear fruit in the coming months.

# /02 ROW (Rest of the World) +9%

All the areas are growing at a steady pace. Exports to distributors in Asia and Mena are the biggest contributors to sales, with the most relevant incremental margins. Faes Gulf recovered the effect of the first half and grew +6%, which is expected to increase gradually during the year.

## Licences

### Licences revenues: 72.8M€ +13%

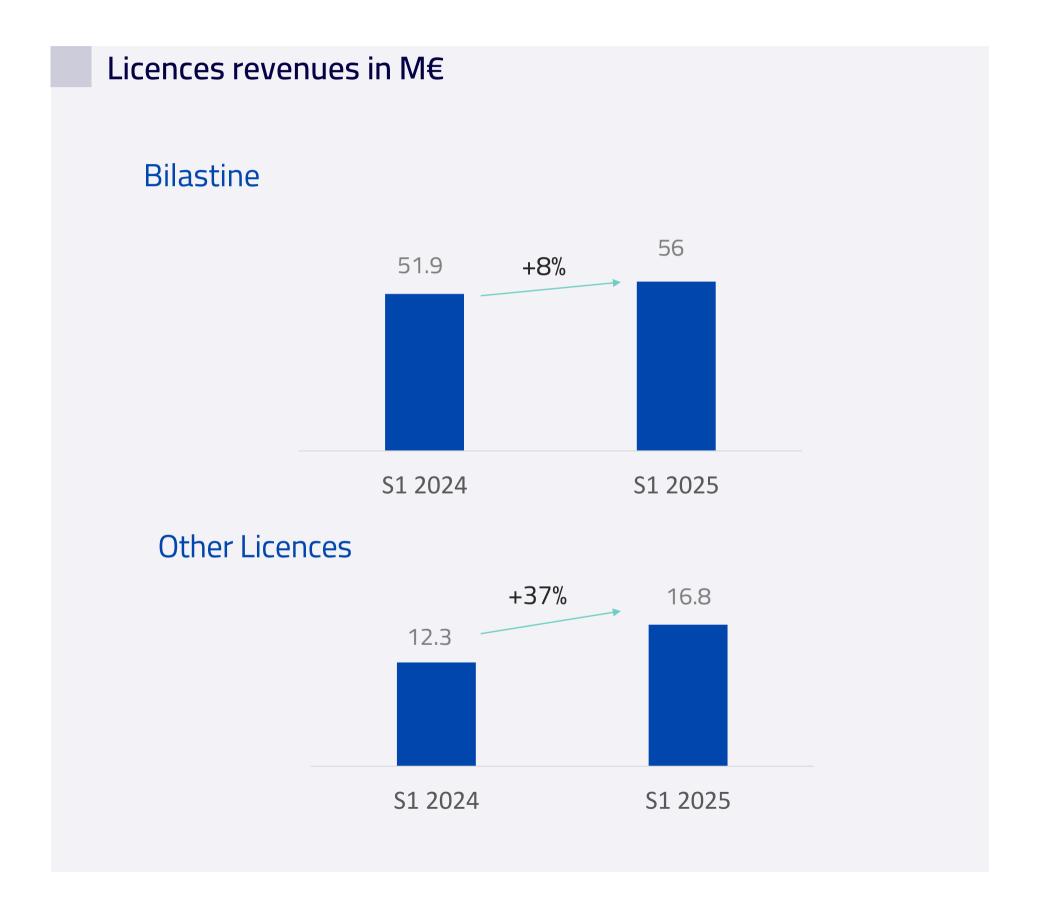

/01 **BILASTINE** +8%

The trend of the first quarter continued, with very positive growth in existing markets (mainly Eastern Europe and South East Asia) and new markets (Australia and China) starting to contribute substantially.

# /02 OTHER LICENCES +37%

Mesalazine shows a significant increase thanks to strong local sales growth in Poland (reaching a leading position) and in the Nordic countries.

New Calcifediol launches in important markets such as France, Poland and the Baltic countries continue to gain market share and are one of the main growth drivers of the business area.

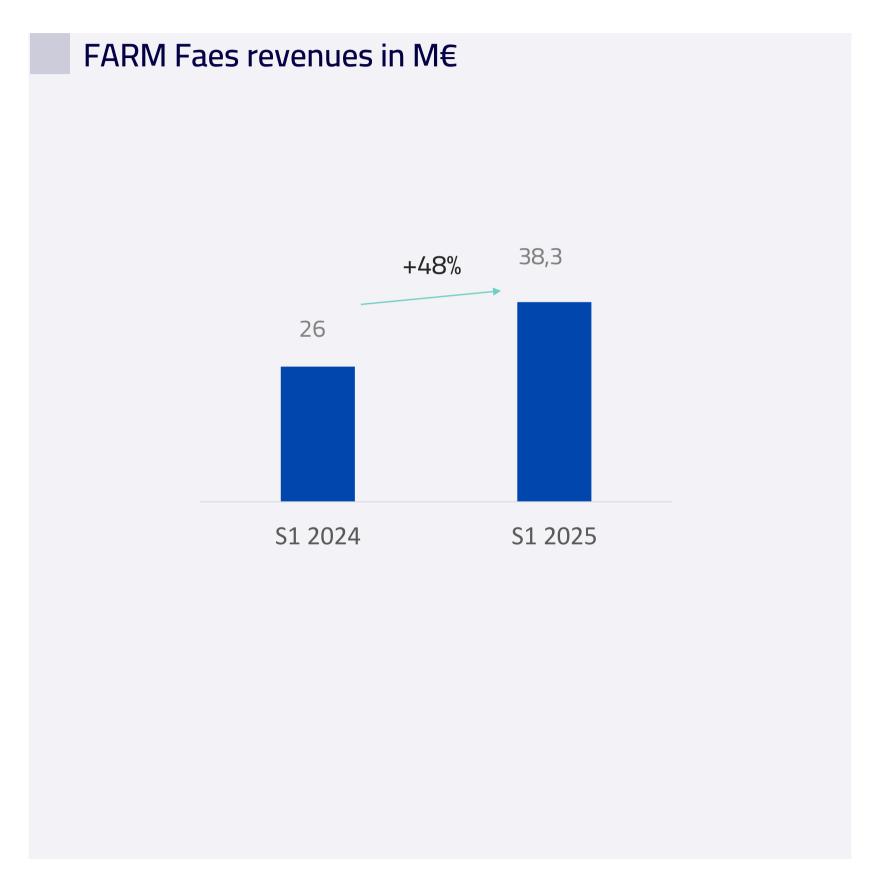

## **Animal nutrition and health**

### FARM Faes revenues: 38.3M€ +48%

/01

Significant growth in revenues, with the ISF business as the main driver with revenues exceeding expectations.

At the sector level, the Spanish pig industry is facing a process of concentration and modernisation: small and less profitable farms are decreasing, while large groups are growing.

3/

## Results and outlook

## P&L

## Highlights H1 2025

#### /01 – Income

Double-digit growth in the high end of the guidance driven by Farma International and licensing, demonstrating robust growth of the three strategic molecules

## /02 – Expenditure

- Increases in expenditure in line with the priorities of the strategic plan, as well as in expenses related to merger and acquisition operations.
- Incremental cost impact of the new Derio plant of 5.9M in H1
- Increase in depreciation and amortisation due to the new production plants

## /03 Adjusted EBITDA

- •Growth excluding extraordinary costs in Derio and results from M&A in line with expectations (+2.5%)
- ■EBITDA at constant scope (excluding EDOL and M&A) above expectations (-4.4% vs. -6/-9%)

#### Results

## **Cash flow**

#### /01 – Financial Situation

- Stable financial situation. Financing of Laboratorio Edol's operation and in the process of negotiating the financing conditions for the acquisition of SIFI.
- Payment of interim dividend in January (€13m). The final dividend has been paid in July (€43m), which will have an impact on cash flow in the second half of the year.

#### /02 – Investments

• Financing of €80m for the acquisition of Laboratorio Edol. Recurring Capex once the major investments in the plants have been completed.

## /03 – Working capital

• Main variation due to the integration of Edol and the safety stocks required by the transfer of production to Derio.
